

**Monex**

This project aims at a new and comfortable interior for the Monex Europe offices in the iconic Picasso Tower in Madrid. It focuses on collaboration and comfort of the employees, with meeting rooms offering breathtaking views of Madrid. The warm colours of wood combine with clean, white surfaces, resulting in relaxed social areas for convening in the much-needed spaces. Monex was looking for the innovative Arquid's vision to create home-offices, so maintaining a friendly but professional approach to everything they do.
