

Monstarlab

Work is fun in the new Monstarlab offices! At the foremost European digital agency Monstarlab, we are convinced that perfect solutions are created by combining excellent design with state-of-the-art technologies. A unique element are the floors from Forbo Flooring Systems, a company that cares about sustainability. Our aim was to lay out different types of surface to achieve a distinctive look and synergy with the overall furnishing of the office. We have installed Marmoleum Solid, Allura LVT Flex and Tessera carpet tiles and used Desktop for the upholstery of the furniture.
