

**Montbell Store South Korea**

Refined materials, restrained structure and the balance that fills the space between them. The Montbell store at Yongsan LS Tower is a project that expresses the brand's depth through space. The flooring is not just a finishing touch, it is the fundamental layer that defines the overall level of completion. Forbo's adhesive-free PVC flooring, Modul'up 4211 | Light Grey Canyon has been chosen. Its calm, subdued grey tone integrates seamlessly into a space where metal and wood coexist, never overpowering, yet clearly present.
