

Moraleja Playroom

Eccentric? Yes. Design? Very special. Customized? Absolutely! In this space, where practicality meets originality, we installed our custom Flotex Vision with a design created by an international artist for a children's playroom in a private home. The unique design not only adds a touch of artistic flair but also creates an engaging and imaginative environment for children to enjoy. Thanks to the exceptional properties of our Flotex, this playroom offers a space where all possible stains can be easily cleaned, ensuring a hygienic environment. Additionally, the flooring provides excellent acoustic absorption, enhancing comfort and reducing noise, making it the perfect setting for playful activities. This project highlights the fusion of creativity and functionality, demonstrating how bespoke design solutions can transform a regular space into an extraordinary play area. The customized Flotex Vision at Moraleja Playroom stands as a testament to the possibilities of personalized design in creating unique and practical environments.
