

Mundaring Arena, Perth WA

The newly built Mundaring arena indoor sporting facility is located in the Perth Hills district. The building caters for a range of sports such as hockey, basketball and netball and was constructed for the local community now and for future generations. Forbo Flotex was chosen for the functionality and longevity and the new plank designs suited the design visual requested. Additionally, Flotex is a proven floor covering in sporting and gym applications. The 70 million nylon 6.6 fibres per m² offer superior wear characteristics and abrasion resistance when compared with other yarns, making it the ideal flooring for high traffic areas. Flotex is also well known for providing healthier indoor quality and has been awarded the asthma and allergy foundation seal of approval.
