

Museum Storage Facility

The repository of four museums (Latvian National Museum of Art, National History Museum of Latvia, Literature and Music Museum, Riga Film Museum of Latvian Academy of Culture), known as the Museum Storage Facility, was opened in December 2019. Forbo's Allura luxury vinyl tiles, Sphera Element homogeneous vinyl and Nuway and Coral entrance flooring systems have been installed. The sturdy Allura Material tiles match perfectly with the modern and industrial look of the remarkable building.
