FLOORING SYSTEMS

creating better environments

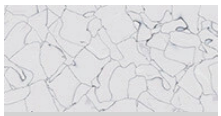

Mälarsjukhuset hospital

Mälarsjukhuset hospital has been equipped with Forbo flooring solutions tailored to the high demands of healthcare environments. Forbo Sphera homogeneous vinyl flooring was chosen for most areas because of its hygienic, durable and slipresistant surface and its ability to support clear zoning. Colorex tiles have been installed in server rooms for reliable ESD protection. Surestep flooring has been applied in the wet areas for added slip safety.
