

Next Practice Victoria Park

Next Practice Victoria Park is not your average general practice. It redefines the everyday healthcare interior to align with today's lifestyle. The interior provides a warm, relaxing and comfortable atmosphere for its staff and clients. Forbo Allura Flex planks were specified in the consulting rooms and main reception area. Allura Flex offers the best of both worlds, a warm feeling of a natural timber floor with the comfort and easy to clean properties of a luxury vinyl tile. The space also features an interactive screen that creates meditative sounds and shares news and interesting articles from the clinic. The child play area with iPads helps the user experience.
