

Niftarlake College

In the Niftarlake College 4,600 m2 Marmoleum flooring has been installed together with Coral entrance mats. The job was done within six weeks school summer holidays. Mr Dreu, Facility Manager at Niftarlake: "Marmoleum is simply the best floor in the market: sustainable, strong and resilient. And you get the high-quality adhesives and equalizations from Eurocol. The biggest plus is the back-up of Forbo. If there is a delay - and that happens soon with such a big job - Forbo acts on behalf of me in consultation with the floor layers involved. At such a moment you do not have to discuss with all parties yourself."

Project name	Niftarlake College
Installation by	Lensen projectinrichters
Location	Maarsse
Photographer	Erik Poffers
Date of completion	augustus 2018

Used Products

Marmoleum Real blue
