

## Niftarlake College

In the Niftarlake College 4,600 m<sup>2</sup> Marmoleum flooring has been installed together with Coral entrance mats. The job was done within six weeks school summer holidays. Mr Dreu, Facility Manager at Niftarlake: "Marmoleum is simply the best floor in the market: sustainable, strong and resilient. And you get the high-quality adhesives and equalizations from Eurocol. The biggest plus is the back-up of Forbo. If there is a delay - and that happens soon with such a big job - Forbo acts on behalf of me in consultation with the floor layers involved. At such a moment you do not have to discuss with all parties yourself."

Projekta nosaukums	Niftarlake College
