

Nightingale Marrickville

Nightingale Housing, in partnership with not-for-profit Fresh Hope Communities, has delivered Nightingale Marrickville a thoughtfully designed rental community in Sydney's inner west. The project, designed by SJB Architects, features 54 space-efficient Teilhaus apartments and generous shared spaces that foster community connection. Each home is offered at 20% below market rent, making high-quality, sustainable housing more accessible to residents. Marmoleum Cocoa was chosen for its natural, sustainable composition and subtle, organic texture, complementing the project's warm, minimalist aesthetic and commitment to environmental responsibility. A collaboration that reflects how good design and social purpose can go hand in hand.
