

**Norwest Prosthodontics**

The team at Norwest Prosthodontics briefed Interior Life to design a space that feels nothing like a dental clinic. The result is warm, calm, and quietly sophisticated. The flooring was central to achieving that mood. Forbo Flotex Code in Linen was specified for the corridors, a flocked resilient tile that carries the warmth of textile with the hygiene performance a clinical environment demands. Through the reception and office spaces, Tessera Accord in Enduring Earth provides a grounded, contemporary base that absorbs footstep noise.
