

Nuway Tuftiguard black anodised

The entrance of a large office building in Dublin has recently received a facelift thanks to the installation of Nuway Tuftiguard Classic Black Anodised, by Andrew Scollan Matting Systems. By choosing a double classic grey wiper strip with black anodised aluminium scraper bars, this ensures that the customer will receive the best possible dirt and moisture removal whilst obtaining a sleek, modern aesthetic for their entrance. This enhanced protection will not only improve the general look and feel of this busy entrance, but it will also help to remove dirt and moisture from the soles of shoes and wheel treads which will help to reduce the number of accidental slips or falls occurring within the building as well as protect interior floor finishes.
