

Nuway Tuftiguard perfect for a busy temple

A temple in Chorley has recently had Nuway Tuftiguard Classic in 17mm closed construction installed by the Northern team at Master Matting. As Nuway is ideal for entrance areas of all shapes and sizes, it was perfect for the design of the architecturally striking building. With three points of access, each with their own set of revolving doors, the rigid entrance flooring system will help to stop the outside from travelling in. Due to the busy nature of the temple, removing soil from soles of shoes and wheel treads was essential in preventing accidental slips and protecting interior floor surfaces. Nuway Tuftiguard Classic is also reversible, which effectively doubles the lifespan of the entrance flooring.
