

## Office Škoda Auto

In the AFI administrative building, Škoda Auto a.s. transformed several floors into impressive offices with the help of architect Vlastimil Páček. The design balances modern aesthetics with functionality, acoustics, and a comfortable working environment. A standout feature is the distinctive floor, created with Flotex Flocked Flooring planks arranged in a unique pattern. The Converge design from the Flotex Planks collection complements wall art, combining the comfort of carpet with the durability of vinyl – an ideal solution for multifunctional office spaces.
