

Office Czaar Peterstraat Amsterdam

FELD created a shared office space from an old sound studio. The office has a number of fixed and flexible workspaces, a kitchen, lunch room and meeting room. The staircase has been designed by FELD, as are all storage cupboards. The toilet group was expanded and a more cohesive, open space was made. Leon de Korte made the illustrations on the wall. Francine Meerveld, interior architect, has realised this beautiful project. Francine's strength is characterised by the combination of communication and design. Creating concepts by listening to stories and background. Concepts that make you happy. On the floor Marmoleum Concrete beton is used, for a sturdy modern look.
