

Omagh Hospital & Primary Care Complex

The Omagh Hospital is the first major greenfield hospital project to be carried out in many years. With over 50 years of experience working on large scale projects, Forbo Flooring was the obvious choice when it came to providing the kind of flooring range required for such a prestigious undertaking. Working closely with Floorform, who expertly installed the flooring, as well as TODD Architects and McLaughlin & Harvey and the Western Trust, Forbo was able to provide a wide range of flooring solutions from entrance ways and high quality, sustainable floor coverings, to hygienic and slip resistant surfaces. "The Forbo range was selected for use in the Omagh Hospital project and the various complementary flooring products suited many applications in the project. The Marmoleum range met the technical, environmental and maintenance requirements of the scheme. A wide range of available colours assisted with the interior design development, branding and way-finding design." Andrew Murray, Todd Architects
