

**Ombudsman's office Brno**

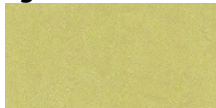

By designing the extension of the Ombudsman's building, the architect based on the concept of sustainability and the environmental principle. He chose top class ecological materials that last long and can be renovated if necessary. Forbo has offered a complete solution for all interiors. The main floor is linoleum Marmoleum, which he used for the corridors and children's center. Regarding the acoustic properties, he chose Flotex for the offices. Coral Duo mats works great at the entrance and stop the dirt and moisture. Bulletin Board was used as a communication tool for notice board.
