

Ormskirk Hospital

Looking for a time and cost saving solution, Southport and Ormskirk NHS Hospital Trust chose Forbo Flooring Systems' Modul'up adhesive free sheet vinyl for the refurbishment of the Children's A&E and Children's Ward at Ormskirk District General Hospital. Easy and quick to install during out of hours, the 'fast fit' floor covering delivers outstanding dimensional stability and indentation resistance. After nearly 30 years without refurbishment, the Paediatrics department at Ormskirk District General Hospital required a new lease of life to be injected into the building. With hospitals in operation around the clock by patients, visitors and staff, it was vital that the new flooring solution offered a combination of optimal performance benefits, whilst being quick and easy to install to minimise both disruption and downtime.
