

Orthodontics Dr. Aull in Rheine

The orthodontist Dr. Aull in Rheine is equipped with modern dental technical equipment and appliances, which enable a gentle, almost painless treatment. The technical equipment offers a variety of treatment options, so that a suitable solution is offered for every concern. In the practice rooms, a special atmosphere ensures that every patient feels comfortable and can relax optimally before, during and after treatment. The interior design of the practice is characterised by a coherent design concept. Eternal vinyl flooring in a stone look has been laid over an area of around 400 m². Eternal is durable and guarantees low cleaning and maintenance requirements. The vinyl floor meets the highest hygiene standards and looks well cared for for many years. Thanks to the PUR Pearl surface finish, the surface is very resistant to scratches, even when there are a lot of patients in the practice.
