

Oulu Airport Cafe

Marmoleum Modular helps you create the floor of your choice. The collection invites you to experiment with your selected tiles, combine and connecting them to form different shapes, sizes and colours. A wholly original floor design is possible, going well beyond conventional floor designs where stock patterns and shades are the only options. You can achieve subtle results by playing with gentle tonal variations, for example mimicking floors or natural stone or concrete, or you could express bold design ideas in a vibrant pattern of contrasting colours.
