

PGIM

AL Architects were appointed for as Architects and DTL for this accelerated office refurbishment and fitout project comprising circa 1,970 m2 at ground floor and 275 m2 at mezzanine level. The existing building was stripped back to bare shall and redesigned to accommodate several departments within the PGIM company. We have an extensive history working with Forbo Flooring. Forbo sent through all the available finishes in plank and tiles together with the sheet and lobby flooring options. We were able to give the client a visual experience throughout the building and gave the building the lift that it deserves.

Location	Letterkenny, Ireland
