

People Scout True Blue Company

The elegant, industrial interior with golden and blue elements of the People Scout True Blue Company office creates an unconventional working climate. A modern version of the classic wall covering around the walls of the office makes the interior more cozy and at the same time more representative. Homely seats harmonise perfectly with an elegant, delicate climate of social zones, and the floor (Forbo Tessera Layout&Outline) laid in the shape of herringbone refers to modern trends.
