

Prinses Màxima Centrum

The Prinses Màxima Center is in more than one respect a special hospital. This nationwide top medical center is fighting against childhood cancer and strives for a cure for all her patients! Children with cancer are encouraged to continue to develop as much as possible in all respects to prevent delays in personal development. In that context, the hospital contains numerous diversion and movement spaces. Places where children can play, move, discover, and learn. The Marmoleum floors ensure clear and colorful recognition of the various spaces. From entrance to operating room to movement space and science center.
