

Quince Homes

Surrounded by the breathtaking scenery of Morecombe Bay, the luxury Pippins Beck residential development in the Lake District demanded high expectations from its interior finishes. Forbo Flooring System's Allura LVT was specified as the ideal solution to match both the desired aesthetics and required performance. With a desire to create a vibrant new community, Quince Homes envisioned Pippins Beck as a place where families could enjoy the benefits of countryside living while accessing high-quality housing. Located within the beautiful landscape of Ulverston in the Lake District, their plans included a balanced mix of affordable and market homes, bringing new opportunities to the area. Following planning approval, work commenced in Winter 2025 with the excavation of the first foundations. Delivering over 260 units across eight years, the first phase is well underway with the construction of 14 plots. Consisting of three, four and five-bedroom semi-detached and detached houses, the development is perfect for growing families or those looking to settle into a quieter environment.
