

**Résidence hôtelière ADAGIO, Plescop**

The architect in charge of the ADAGIO hotel residence project trusted Forbo Flooring Systems to choose flooring. He selected the Flotex product, a walking-friendly flocked textile flooring known for its acoustic properties and easy to maintain. This floor is ideal for high-traffic areas such as hotels. The selected products are part of the Flotex Wood collection. This collection offers patterns that look like a real wood with the advantages of a textile floor. Many combinations of patterns are possible.
