

RAINS

RAINS is a Danish rainwear company founded in 2012. Based on an early initiative to interpret the traditional rubber raincoat in a novel way, the company has, since its foundation, grown into an accomplished international rainwear brand. Inspired by both Scandinavian weather and design heritage, RAINS merge traditional methods with innovative techniques to create understated and considered rainwear made to last beyond the season. Forbo's linoleum was chosen because of the colours, design and the fact, that Forbo Flooring can deliver to most of the world.
