

**REGENERV, Olsztyn, Poland**

The REGENERV Foundation for Nerve Cell Regeneration is a Public Benefit Organization founded in 2013 in Olsztyn. Thanks to the Foundation's activities, an ultra-modern laboratory has been built in which it is possible to grow stem cells. In the cleanroom, Forbo Colorex tiles were installed due to the need to maintain restrictive cleanliness parameters, the achievement of which requires the use of specialized finishing materials.
