

RICS Scotland

After acquiring new premises in Edinburgh, the Royal Institution of Chartered Surveyors (RICS) relished the opportunity to be able to put their own creative stamp and branding on the building. Brought on board to design the interior, Michael Laird Architects specified a range of products from Forbo Flooring Systems and created a floor space that was practical, impactful and complementary to the overall character of both the building and the RICS brand – which helped the project win the 2015 Fly Forbo competition.
