

RMIT Simulated Health L3 & L4

RMIT University has recently completed a new impressive health simulation ward to train our future healthcare providers. This project included a state-of-the-art hospital situation ward, training bathroom as well as areas for community and mental health. The architect selected Marmoleum flooring because of its proven performance within the healthcare sector, ease of maintenance, leading sustainability attributes (Produced CO2 neutral cradle to gate) and with a vast colour pallet to choose from. The creative lines and dimensions on the floor were installed via the highly skilled Marmoleum installers from Asset Flooring Group Melbourne.

Installation by	Asset Flooring Group Australia
Architect	Vincent Chrisp & Partners
Location	Melbourne, Australia
Photographer	Kane Jarrod Photography
