

ROC Aventus - The Taste of Italy

ROC Aventus, a regional training center in Apeldoorn, The Netherlands, considers the health of its students and employees important. Therefore the catering is provided by Markies Catering, who considers affordable and healthy choices to be of paramount importance. The new tastefully decorated canteen "The taste of Italy" is already one of the favorite spots in school. Verel has realized the design and the interior with the concept of "The Taste of" in mind. Now it is The Taste of Italy but with a few minor interventions it can be transformed into "The Taste of Mexico". Gwenda Harmsen, interior project manager at Verel: "The floor has to stand out, be something completely different and that is possible with Eternal Digital Printed Vinyl". The grey 3D cube design creates an illusion of depth and combines beautifully with the modern concrete look from our Eternal Material collection. ROC Aventus is an MBO school with a diversity of pupils and a wide choice of training courses, from fitter to hairdresser to doctor's assistant. This diversity had to be reflected in the interior. The floor not only determines the atmosphere, but also ensures correct routing.

Project name	ROC Aventus - The taste of ...
Location	Apeldoorn, The Netherlands
Commissioned by	Markies Catering
