

## Radisson Blu Scandinavia Hotel – Fast Renovation with Loose-Lay Flotex Next

Radisson Blu Scandinavia Hotel in Gothenburg needed to refresh a multifunctional room without interrupting operations. The main challenge was avoiding downtime – traditional renovation like sanding and varnishing would have kept the room out of service for several days. The solution was Flotex Next, a loose-lay textile floor that could be installed directly over the existing parquet. The result is a cozy, upgraded look and a room ready for guests the same day. Using FloorVisualizer, the hotel easily selected the perfect pattern without external support. Flotex Next combines quick installation with durability and easy cleaning – ideal for hotels where time and hygiene are critical.
