

## Residencia Amboage

Residencia Amboage is a 120-place residential unit with 4,500 square meters of construction and 15,000 square meters of gardens. The building takes up the concept of the traditional cloister and is organized around a large central garden presided over by a fountain. It is not a closed cloister, but open at the ends, taking advantage of the sloping ground and seeking varied visual approaches. Forbo's products offer excellent features for use in Residencia Amboage. The subtle design of the Sphera Element homogeneous vinyl flooring allows the floor to blend into its surroundings. Forbo's Surestep safety vinyl floors ensure good slip resistance, Surestep Laguna even in wet areas. The Onyx+ durable vinyl wall covering is perfectly suited for wetroom application in senior residences.
