

Restaurant la Nouvelle Table, Varennes Vauzelles

©Alexandre Lescure

For the New Table Restaurant project, the architect called on Forbo Flooring Systems to choose flooring. The product chosen is the flotex, a flocked textile flooring known for its acoustic properties, walking comfort and ease of maintenance. The Flotex Wood collection offers a design that looks like a real wood with the advantages of textile flooring. The combination of patterns is easy and allows you to create a unique place.
