

Riga English Grammar School

The Riga English Grammar School is an educational centre ready for global education: they offer international projects in connection with the daily learning process, teaching methods and approaches for integrating English into the learning process, awareness and practice of one's own identity, citizenship and values in a multicultural environment. In addition to Smaragd Lux floors, Eternal digital print floors with a Scottish design print were installed in many rooms in this educational centre. Forbo's advanced digital printing technology enables striking floor visuals that cannot be achieved with conventional print techniques. It enables you to design your own unique floor in the high quality of our heterogeneous vinyl sheet flooring.
