

Riga Technical University (RTU) Scientific Library

The Scientific Library of Riga Technical University is an academic library of state significance with the largest collection of traditional sources on engineering and architecture in Latvia. There is a spacious reading hall with library stock in open access, overnight reading room, reading and resource room for the academic staff, reading room for students with children, silent reading room, cozy kitchenette for visitors, as well as a transformable conference hall. On the floor various colors of Sarlon acoustic vinyl have been used, which is an ideal acoustic floor covering for these kind of areas.

Location	Riga, Latvia
