

Riga Technical University (RTU) Scientific Library

The Scientific Library of RTU is an academic library of state significance with the largest collection of traditional sources on engineering and architecture in Latvia. There is a spacious reading hall with library stock in open access, overnight reading room, reading and resource room for the academic staff, reading room for students with children, silent reading room, cozy kitchenette for visitors, as well as a transformable conference hall. Sarlon acoustic is ideal for this kind of areas. Various Sarlon acoustic products have been used.
