

Royal Aberdeen Children's Hospital

After extensive colour research, Tinto Architecture specified Forbo Flooring Systems' acoustic floor covering, Sarlon, in an array of striking colours, in order to create an interior that had a profoundly positive effect on both patients and staff at The Royal Aberdeen Children's Hospital. Sarlon not only offers striking designs, but also the benefits of 15dB impact sound reduction and easy maintenance. The mood-boosting Sarlon colours are combined with a calming Eternal Wood design and a Coral entrance flooring.
