

Royal Aberdeen Children's Hospital

After extensive colour research, Tinto Architecture specified Forbo Flooring Systems' acoustic floor covering, Sarlon, in an array of striking colours, in order to create an interior that had a profoundly positive effect on both patients and staff at The Royal Aberdeen Children's Hospital. The array of calming and mood-boosting colours from the Sarlon collection is also combined with the benefits of 15dB impact sound reduction and easy maintenance. What's more the project went on to be recognised for a commended award in the 2016/2017 Fly Forbo competition.

Architect	Tinto Architecture
Photography	Neil Gordon
General Contractor	ARCHIE Foundation
Flooring Contractor	General & Technical Flooring Surfaces
Location	Aberdeen, UK
