

## Rugby Museum

NZ Rugby was building its new museum in Palmerston North and wanted a bit of WOW for the shop. It needed to incorporate the provinces' colors, it needed to be welcoming and it needed to complement rugby as a genre of passion for the NZ public. The decision to use Forbo Marmoleum flooring was very easy. It is after all, the leading resilient floor in the world, incorporates 150 years of product development, has an amazing natural color palette and is installed in a high pedigree of buildings.
