

SC Paderborn 07 VIP-Lounge, Paderborn

Nearly 500 square meters of Flotex Planks form the basis for a relaxed soccer experience for almost 400 VIP guests in the VIP lounge of the Benteler Arena in Paderborn. Christian Schuster from Freiraum Planungsbüro was responsible for the feel-good ambience. Here, the sports club's holistic interior design concept includes not only a fancy lighting installation but also the creative design of the floor surfaces. "The unique feel of the flooring and its sound-absorbing effect decelerate the atmosphere in the room," says Schuster, who particularly appreciates the combination of functional and design aspects of Flotex flooring. It was precisely this combination of the exclusive look of the textile surface and the high durability of the flooring that also convinced the sports club SC Paderborn to give preference to the flock flooring. While Flotex planks in a herringbone pattern in three harmonious colorways are convincing in the main area, a calm gray tone was chosen for the adjacent lounge and a radiant red tone for the new media lounge. With around 90 colorways, Flotex's broad color selection offers the opportunity to set color highlights.
