

SRO AG Hospital Region Oberaargau

In December 2017, the renovation of the gynecological clinic and the intensive care unit of the SRO AG Spital Region Oberaargau in Switzerland was completed. To create a relaxed atmosphere in the hospital, Eternal Colour vinyl flooring was used in the corridors and in the rooms. Eternal Colour is durable, easy to maintain and presents an extraordinary color palette. In the intensive care unit Colorex flooring has been applied. Colorex is particularly well-suited for use in clean rooms, as it has a non-porous surface with the lowest outgassing behavior and excellent resistance to dynamic and mechanical stress.

Photographer	Willy Jost, Busswil
