

Sales area at Jandri in Les 2 Alpes

When the Jandri cable car in Les 2 Alpes was replaced, a ski pass sales area was installed for the convenience of winter sports fans. The various parties involved in the project chose to install a flooring that was both aesthetically pleasing and technically advanced: Flotex. Skiers can come in their boots and ski boots without leaving any traces of water or snow, as Flotex absorbs moisture. To create an immersive atmosphere, the floor has been customised to create relief with contour line decorations on the ground. Its ease of maintenance, technical qualities and elegant, unique design make Flotex the perfect solution for ski area infrastructures! A total of 611 m2 of customised Flotex flooring has been installed.
