

Salon Just Fontaine

Located in the heart of the Stade Auguste Delaune in Reims, the Just Fontaine lounge is a premier reception area that welcomes partners and guests of Stade de Reims. Designed to be a welcoming and elegant space, it must combine aesthetics, comfort, and durability to meet the demands of an environment that hosts the public during matches and events. As part of the renovation of this space, completed in January 2026, a total of 1 050 m² of Flotex flooring was installed by the Forbo installation school. Flotex offers both excellent underfoot comfort and high resistance to foot traffic. These characteristics make it a particularly suitable solution for hospitality and reception areas, where visitor traffic can be heavy during events. Practical for everyday use, this flooring also stands out for its ease of maintenance and its ability to retain its appearance over time.
