

FLOORING SYSTEMS

creating better environments

## Samsung Electronics Office in Pyeongtaek

Global leader Samsung has consistently pursued the highest standard of quality in every space they create. The fact that Samsung has continuously chosen Forbo Flotex over many years is a clear testament to the product's proven performance and reliability. Flotex featuring various custom digital prints have been installed to reflect Samsung's brand identity of design precision and visual clarity. This approach demonstrates Samsung's philosophy of integrating brand expression into every detail of its built environment. Beyond aesthetics, Flotex contributes to healthier and more comfortable spaces through its unique structure that absorbs sound, captures allergens and fine dust, and supports improved indoor air quality. The partnership between Samsung and Forbo Flotex goes far beyond flooring.
