

Schüller Möbelwerke KG: Linoleum Kitchen by next125

next125 is the international premium brand of Schüller Möbelwerke KG, one of Germany's leading kitchen manufacturers based in the Franconian town of Herrieden. As a family-owned company with a strong tradition of craftsmanship and a high level of innovation, Schüller combines timeless design, technical precision, and state-of-the-art production in its next125 brand. The next125 brand stands for authentic kitchens – inspired by the principles of Bauhaus. Clean lines, minimalist design, and functional aesthetics define the brand's visual identity. Sustainability is an integral part of next125's philosophy: Respect for nature and the environment is a central focus – throughout the entire production and supply chain. As a responsible manufacturer with a strong connection to nature, next125 is particularly committed to reducing CO₂ emissions. A special highlight is the linoleum kitchen: The surface is made of Furniture Linoleum by Forbo – a natural, pleasantly warm material that impresses not only with its velvety-soft feel but also with its high everyday functionality. This sustainable linoleum is made from renewable raw materials such as linseed oil, resins, and wood flour, combining ecological responsibility with contemporary design. The product is low-maintenance, antistatic, and with its matte, elegant appearance, makes a statement for conscious material choices. Perfect for anyone who values design, sustainability, and premium surface quality.
