

School center ISW Gasthuislaan

School center ISW Gasthuislaan has built a completely new wing and the old part of the school has been completely renovated. For a floor of a secondary school it is especially important that it is durable and strong. Every day hundreds of students walk over it. In addition, it is a requirement that the floor is easy to maintain and clean. Marmoleum flooring is then the ideal solution. The floor covering is extremely durable and also lasts for a long time.
