

Secret de Jouvence

Le Secret de Jouvence is an aesthetic medicine center offering a range of aesthetic, body contouring and anti-aging services based in Reims, France. Its main services include aesthetic medicine aimed at reducing the signs of aging, as well as dietetics with a dedicated area to guarantee a personalized approach. The wellness center also offers a baby spa for young parents and their babies. A Coral welcome mat has been installed at the entrance to the center to ensure the best possible welcome for customers and to protect the flooring. For its flooring, the wellness center chose Flotex in its treatment rooms as well as in the waiting room, for an optimal ambience as soon as customers arrive. Flotex flooring is easy to clean, pleasant to walk on and renowned for its acoustic properties. Selected decors in blackened oak and natural white oak create a natural feel with wood patterns, while the Anne-Claire Petit pattern brings softness and comfort to the Baby-Spa room. Allura decibel flooring was installed in the consulting room, again with a wood pattern.
