

Seongnam Seohyeon Library

Seohyeon Library In Korea is a cultural complex for residents with a library, electronic information room and lounge. A light grey Marmoleum color is applied in the library and conference room area to give it a neat and clean appearance. In the children's library various bright colors are used to create a playful space. It's a place for children to sit down or lie down with their shoes off. So, we have created an environment that children can use safely with environmentally friendly flooring material.
