

## Simone Veil School Group

The Simone Veil school complex in Vertou offers a modern and functional environment for elementary and preschool students. As part of its interior design, nearly 4 000 m<sup>2</sup> of Marmoleum decibel in a special cocoa finish was installed in classrooms and hallways, ensuring excellent acoustic performance and optimal comfort on a daily basis. For multipurpose and extracurricular spaces, 400 m<sup>2</sup> of Flotex planks were installed, providing softness to the touch, sound absorption, and resistance to intensive use. These 4 400 m<sup>2</sup> of carefully selected floor coverings create a calm, hygienic, and sustainable environment designed for the well-being and concentration of children, while meeting the requirements of a modern school.

Nom du projet Groupe scolaire Simone Veil

Maîtrise d'ouvrage Ville de Vertou
